

ADAPTIVE TO RESIST + MITIGATE

Per-Johan Dahl & Caroline Dahl

Lund University & Swedish University of Agricultural Sciences, SE
Smog Studio

P.J. Dahl - Associate Professor at Lund University, Architect, PhD in Architecture at University of California Los Angeles. He has taught at several universities in Europe, Hong Kong, the Middle East, the U.S. He is faculty and board member of the Research Institute for Experimental Architecture (RIEA), member of the China Room expert panel at Politecnico di Torino. P.J. Dahl's research interests concern architecture in urbanization, with an emphasis on new modes of design thinking, the politics of urban form, emergent building types.

C. Dahl - PhD in landscape architecture at the Department of landscape architecture, planning and management at SLU, Master of Spatial Planning in Karlskrona, SE, Master of Architecture in Los Angeles, USA. Since 2016 she is the head of the Think Tank Movium and serves on the editorial board of the Swedish professional magazine STAD, dedicated to debate and reflections on contemporary urban landscapes. They are founders of Smog Studio: a research oriented design practice committed to mediate the intersections and overlaps between architecture and urbanism.
