URBAN MORPHOLOGY IN THE AGE OF ARTIFICIAL INTELLIGENCE

call for abstracts

In the 21st century, artificial intelligence introduces new concepts to urban development, seamlessly integrating with traditional urban morphology to explore emerging paradigms for the future. As cities face challenges like rapid urbanization and climate change, AI offers innovative solutions to reshape our urban landscapes.

'Urban Morphology in the Age of Artificial Intelligence' will investigate **how AI is revolutionizing our approach to urban structures**, covering four thematic areas:

SHAPING THE CITY
Exploring Future Urban Forms

MAPPING THE CITY
Evolving Tools to Study Urban Forms

ENVISIONING THE CITY
Enhancing Theoretical Models of Urban Forms

AI APPLICATIONS ON URBAN FORMS
City as a Device (Agents & Experiments)

Abstracts submission deadline	February 3rd, 2025
Notification of abstracts acceptance	March 10th, 2025
Preparatory seminar in Nanjing	March 31st, 2025
Regular registration deadline	April 7th, 2025
Late price registration deadline	May 19th, 2025
Conference program publication	May 26th, 2025
